4 first-author publications | 10+ peer-reviewed papers | Thermochronology & Tectonics specialist

RESEARCH PROFILE

Early-career geoscientist specializing in tectonic–climate interactions and intracontinental orogenesis, with a focus on the Pamir–Tianshan system. My research integrates low-temperature thermochronology and thermo-kinematic modelling to quantify exhumation and deformation processes.

RESEARCH INTERESTS

- Low-temperature thermochronology and thermo-kinematic modelling
 - Tectonic–climate–erosion coupling in orogenic systems
 - Intracontinental deformation and fold-and-thrust belt evolution
 - Exhumation processes and landscape evolution in Central Asia
-

EDUCATION

PhD in Thermochronology (Expected 2026), University of Potsdam, Germany

- Topic: Tectonic–Climate–Erosion Interactions in the Pamir–Tianshan Region
- Supervisors: Prof. Peter van der Beek, Prof. Edward Sobel

MSc in Structural Geology (2022), Nanjing University, China

- Thesis: Late Mesozoic Intracontinental Deformation and Magmatism of the North Tianshan and Junggar Basin

BSc in Geology (2018), Chang'an University, China

PUBLICATIONS

First-Author Publications:

Wang, F., Luo, M., He, Z., et al. (2024). Mid-Cretaceous Accelerated Cooling of the Beishan Orogen, NW China: Evidence from Apatite Fission Track Thermochronology. *Lithosphere*.

Wang, F., He, Z., Ge, R., et al. (2024). First identification of Late Mesozoic intraplate magmatism in the Chinese North Tianshan: Implications for the orogenic architecture and crustal evolution. *Journal of the Geological Society*.

Wang, F., Luo, M., He, Z., et al. (2022). Late Mesozoic intracontinental deformation and magmatism in the Chinese Tianshan and adjacent areas, Central Asia. *GSA Bulletin*.

Wang, F., Lu, Y., Zheng, B. et al. (2021). Deformation features of the Neoproterozoic blue schists terrane in the Wushi-Aksu area. *Acta Geologica Sinica*.

Co-Author Publications:

Luo, M., He, Z., **Wang, F.**, et al. (2025). Tectono-thermal evolution of the Kanggur-Huangshan shear zone, Chinese Tianshan: Insights from integrated geochronology and thermochronology. *Journal of Asian Earth Sciences*.

He, Z., Song, S., **Wang, F.**, et al. (2024). Late Mesozoic intracontinental reactivation of the southern Altai, Central Asia. *GSA Bulletin*.

He, Z., Glorie, S., **Wang, F.**, et al. (2023). A re-evaluation of the Meso-Cenozoic thermo-tectonic evolution of Bogda Shan (Tian Shan, NW China) based on new basement and detrital apatite fission track thermochronology. *International Geology Review*.

Luo, M., He, Z., **Wang, F.**, et al. (2023). Exhumation and preservation of the Tianyu Cu-Ni deposit constrained by low-temperature thermochronology: Insights into the thermo-tectonic history of the Chinese Eastern Tianshan. *Ore Geology Reviews*.

Zhu, W., **Wang, F.**, Cao, Y., & Wang, S. (2020). Tectono-magmatic events in Tianshan Mountains and adjacent areas during Yanshanian Movement period. *Acta Geologica Sinica*.

Conferences Abstract:

Wang, F., Sobel, E. R., van der Beek, P. (2026). Late Cenozoic Pamir-Tianshan convergence and its tectonic-climatic implications revealed by low-temperature thermochronology. *EGU General Assembly 2026, Austria*.

Wang, F., Sobel, E. R., van der Beek, P. (2025). Late Cenozoic convergence between the Pamir and the Tianshan recorded by zircon and apatite (U-Th-Sm)/He thermochronology. *19th International Conference on Thermochronology, Japan*.

Wang, F., Sobel, E. R., van der Beek, P. (2024). New Constraints on Late Cenozoic Convergence between the Pamir and South Tianshan from Apatite (U-Th-Sm)/He Thermochronology. *EGU General Assembly 2024, Austria*.

Ongoing Research:

Wang, F., Sobel, E., van der Beek, P., et al. (2026). Late Cenozoic convergence between the Pamir and the Tianshan revealed by low-temperature thermochronology. *Tectonics (under review)*.

Wang, F., van der Beek, P., Sobel, E., et al. (2026). Thermo-kinematic constraints on the growth of Pamir Frontal Thrust (NE Pamir) (*In preparation for Geology*).

Wang, F., Sobel, E., van der Beek, P., et al. (2026). Tectonic versus Climatic Forcing of Exhumation in the North Pamir (*In preparation for EPSL*).

Wang, F., Sobel, E., van der Beek, P., et al. (2026). Onset of South Tianshan Deformation and Subsequent Foreland Basin Propagation Revealed by Thermochronology (*In preparation for JGR-Solid Earth*).

SELECTED PRESENTATIONS

Oral Presentations

- EGU General Assembly (2026), Austria
- International Conference on Tibetan Uplift (2025), China
- CGU Annual Meeting (2022), China

Seminars & Invited Talks

- MinPet Seminar, University of Potsdam (2024), Germany
- SMURF Seminar, University of Potsdam (2024), Germany

- FTB Workshop, University of Pavia (2023), Italy

Posters

- International Thermochronology Conference (Thermo 2025), Japan
 - EGU General Assembly (2024), Austria
 - Doctoral Seminar, University of Potsdam (2025)
-

TEACHING & MENTORING

Organizer, SMURF Seminar, University of Potsdam, Germany (04/2025 – Present)

- Coordinate seminar series and invited speakers
- Facilitate scientific discussions

Organizer, Doctoral Seminar, University of Potsdam, Germany (03/2025 – Present)

- Organize interdisciplinary doctoral seminar sessions
- Support peer feedback and research presentation development

Teaching Assistant, Nanjing University, China (09/2022 – 02/2023)

- Structural Geology (BSc level)
- Field Camp: supervised geological mapping and field training

Teaching Assistant, Nanjing University, China (09/2020 – 06/2021)

- Structural Geology (BSc level)
 - Assisted with lectures, practical exercises, and student support
-

FUNDING & AWARDS

- China Scholarship Council (CSC) PhD Fellowship (€64,800, 2023–2027)
 - Student Presentation Award, 19th International Thermochronology Conference (2025)
-

TECHNICAL SKILLS

- **Thermochronology:** AFT, AHe, ZHe, $^4\text{He}/^3\text{He}$
 - **Modelling:** Pecube GUI, HeFTy, QTQt
 - **Programming:** MATLAB
 - **GIS & Visualization:** QGIS, CorelDraw, Adobe Illustrator
 - **Analytical Techniques:** ICP-MS, MC-ICP-MS, LA-ICP-MS
-

INTERNATIONAL EXPERIENCE

- Germany – PhD research (University of Potsdam)
 - China – MSc & BSc training
 - Italy – Specialized workshops (structural modelling)
 - Austria – International conferences (EGU)
 - Japan – International conferences (Thermo2025)
-

LANGUAGES

- Chinese (native)
- English (fluent)
- German (basic/intermediate)
